

SCOOTERS

INSTRUCTIONS REGARDING THE OPERATION OF THE SCOOTERS

How to **start** the scooters:
Hold the brake with your left hand and hold down the start button for a few seconds with your right hand and do not accelerate.

How to **start** the Beverly 300CC:
please press this button a little in and then you can turn the key into the position "ON". Please follow now the above instructions.

The scooter does not start if it is parked on the **kickstand**.

How to **lock** the scooter's handlebars:
turn the key to the left and the handlebars too.

Piaggio Aprilia:
This is the button to open the **seat** (if you put the key in the ignition you can't see this button)

INSTRUCTIONS REGARDING THE OPERATION OF THE SCOOTERS

Piaggio Beverly 300CC:

To open the **seat** of this scooter you have to push the button that is next to the fuel button and is shaped like a padlock.

Piaggio Aprilia:

How to open the **fuel tank**: the key has to be in the position of the half circle with the cross and you have to push the key in a little.

Piaggio Vespa and Aprilia:

The **red button** must always be in this position (to the right), otherwise the scooter will NOT start.

The **black button** on the Aprilia always has to be in this position, otherwise it will NOT start.

To **refuel** you must first notify the staff of the gas station that you wish to fill up. It is important that you only put **the tip** of the hose inside the tank. If you put it all the way inside, it will never be full when you arrive at the office. For each missing block of petrol, we charge 2€ + 10€ service charge.
